

Module 1

Foundations of Design

Introduction to Interior Design – principles, elements, and scope

Art & Craft Fundamentals – creative exploration

Design Theory – conceptual frameworks

Communication & Personality Development

Module 2

Construction & Materials

Building Construction – structural basics

Materials & Finishes – surfaces, coatings, and textures

Furniture Systems – design and ergonomics

Accessories & Soft Furnishing

Module 3

Visual Communication & Digital Tools

AutoCAD – drafting and layouts

3D Modelling & Rendering – visualization software

Adobe Suite – digital graphics

Working Drawing & Detailing

Module 4

Space Design

Residential Interiors – homes and apartments

Commercial Interiors – offices, retail, hospitality

Studio Projects – applied design exercises

Model Making – physical prototypes

Module 5

Contextual & Cultural Studies

History of Art & Architecture

Vernacular Craft & Archetypes

Vastu & Feng Shui

Ergonomics & Human Factors

Module 6

Services & Sustainability

Lighting & Color Theory

Building Services – HVAC, plumbing, electrical

Sustainable Design Practices

Module 7

Professional Practice

Estimation & Costing

Project Management

Client Communication

Portfolio Development

Module 8

Industry Exposure

Internship – practical training

Thesis/Research Project – independent study

Final Studio – capstone design project
